# Serial.findUntil()

## Description

`Serial.findUntil()` reads data from the serial buffer until a target string of given length or terminator string is found.

The function returns true if the target string is found, false if it times out.

`Serial.findUntil()` inherits from the [Stream](#) utility class.

## Syntax

`Serial.findUntil(target, terminal)`

## Parameters

*Serial*: serial port object. See the list of available serial ports for each board on the [Serial main page](#).

*target*: the string to search for. Allowed data types: char.

*terminal*: the terminal string in the search. Allowed data types: char

## Returns

Data type: bool.
