Serial.readStringUntil()

Description

`readStringUntil()` reads characters from the serial buffer into a Str The function terminates if it times out (see setTimeout()).

`Serial.readStringUntil()` inherits from the Stream utility class.

Syntax

`Serial.readStringUntil(terminator)`

Parameters

`Serial`: serial port object. See the list of available serial ports for ea board on the Serial main page.

`terminator`: the character to search for. Allowed data types: `char`.

Returns

The entire `String` read from the serial buffer, up to the terminator character

Notes and Warnings

The terminator character is discarded from the serial buffer.
